Component Diagram - Manage Account Access

«container»
Web Application
[React]

Runs in the browser. Shows only the sections each role can use: My Documents, Review Queue, All Documents, and Submit Document, plus the search bar, the review screen with the AI feedback, the profile, and in-system notifications. For the Super Admin: Audit Trail, User Accounts, Holiday Calendar, and AI Settings.

Sends profile and log out requests
[HTTPS / JSON]

Backend Application [Laravel / PHP (Apache application server)]
[container]

«component»
Access Middleware
[Laravel Middleware]

Checks the active session and ends it after 60 minutes of no activity or when the account is disabled. Allows only the sections, actions, and documents permitted by the role, ownership, or reviewer assignment.

Sends log in requests
[HTTPS / JSON]

Passes log out requests

Passes profile requests

«component»
Authentication Controller
[Laravel Controller]

Handles Log In through Sign in with Google and Log Out. Checks that the Google account matches an active DocuFlow account, syncs the name and photo, asks the Document Source, L1, L2, and L3 for the Google Drive permission when DocuFlow does not have it yet, creates or ends the session, and returns the main page and sidebar sections for the role.

«component»
Profile Controller
[Laravel Controller]

Handles View Profile. Returns the read-only profile: photo, full name, email address, role, and account status.

Redirects to Sign in with Google
[HTTPS]

Records session timeouts

Checks the account's role and status
[SQL]

Gets the verified Google account and Drive permission

Records logins, blocked logins, and logouts

«component»
Google Workspace Client
[Laravel Socialite / Google API Client]

Connects to Google Workspace for Sign in with Google, link sharing checks, and reading linked documents and their last modified time. Keeps the Google Drive permission of the document roles encrypted.

«component»
Audit Logging Service
[Laravel Service]

Writes read-only audit records with a server-generated timestamp, including the old and new values when something is changed.

Checks the account and status; saves the name, photo, Drive permission, and last login date
[SQL]

Reads the profile
[SQL]

Gets the email address, name, photo, and Drive permission
[OAuth 2.0]

Writes audit records
[SQL]

«external_system»
Google Workspace

Handles Sign in with Google, checks the sharing of Google Workspace document links, and delivers email notifications through Gmail.

«container»
DocuFlow Database
[MySQL (database server)]

Stores user accounts and roles with the encrypted Google Drive permission, documents and their revisions, Google Workspace links, file details and locations, document hashes, review records and remarks, AI feedback, AI knowledge and settings, the holiday calendar, in-system notifications, the audit trail, and the background job queue.
