Component Diagram - Dashboard, Search & View Documents

«container»
Web Application
[React]

Runs in the browser. Shows only the sections each role can use: My Documents, Review Queue, All Documents, and Submit Document, plus the search bar, the review screen with the AI feedback, the profile, and in-system notifications. For the Super Admin: Audit Trail, User Accounts, Holiday Calendar, and AI Settings.

Sends dashboard, search, document, and notification requests *[HTTPS / JSON]*

Opens Google Workspace links in a new tab *[HTTPS]*

Backend Application [Laravel / PHP (Apache application server)]
[container]

«component»
Access Middleware
[Laravel Middleware]

Checks the active session and ends it after 60 minutes of no activity or when the account is disabled. Allows only the sections, actions, and documents permitted by the role, ownership, or reviewer assignment.

Passes allowed requests (document roles only)

Passes allowed requests (document roles only)

Passes allowed requests (document roles only)

Passes allowed requests (document roles only)

«component»
Document Controller
[Laravel Controller]

Handles View Document. Returns the details, review remarks history, and revision history as read-only, opens a previous revision, and opens or downloads the attached files. Warns when a Google Workspace document was edited after it was submitted.

«component»
Dashboard Controller
[Laravel Controller]

Handles View Dashboard Summary and Generate Dashboard Report. Returns My Documents for every document role, the Review Queue for the reviewers, and the filterable All Documents summary for the Division Chief (L3), with the counts, document lists, reviewer workload, and Average TAT.

«component»
Notification Controller
[Laravel Controller]

Lists the in-system notifications of the logged-in account and marks them as read.

«component»
Search Controller
[Laravel Controller]

Handles Search Documents. Returns the most recent documents, then searches by reference number, document type, description, or the submitter's name, filtered by status and Date Submitted. Searches only the documents the role is allowed to see.

Opens or downloads the attached files

Checks the linked document's last modified time

Records file downloads

Gets current and Average TAT

Requests the PDF report

Checks the account's role and status *[SQL]*

«component»
Document File Service
[Laravel Service]

Saves uploaded files to private storage, and opens or downloads them only after an access check.

«component»
Google Workspace Client
[Laravel Socialite / Google API Client]

Connects to Google Workspace for Sign in with Google, link sharing checks, and reading linked documents and their last modified time. Keeps the Google Drive permission of the document roles encrypted.

«component»
Audit Logging Service
[Laravel Service]

Writes read-only audit records with a server-generated timestamp, including the old and new values when something is changed.

«component»
TAT Service
[Laravel Service]

Starts and stops each reviewer's TAT and counts it in working days (Monday to Friday), not counting the holidays in the Holiday Calendar or the time waiting for the submitter to revise.

«component»
Report Generator
[Laravel Service]

Creates PDF and CSV files of the records being viewed, such as dashboard reports and audit trail exports.

Reads the details, history, and revisions *[SQL]*

Reads the counts and document lists for the role *[SQL]*

Reads notifications and marks them as read *[SQL]*

Searches the documents the role can see *[SQL]*

Reads the uploaded files *[Laravel Filesystem]*

Reads the last modified time *[OAuth 2.0 / Google Drive API]*

Writes audit records *[SQL]*

Reads review dates and holidays *[SQL]*

«container»
Uploaded File Storage
[Private Laravel file storage (application server disk)]

Keeps uploaded PDF, DOCX, and XLSX files (up to 10MB each and 100MB per submission) exactly as submitted. Files are opened or downloaded only through the backend after an access check.

«external_system»
Google Workspace

Handles Sign in with Google, checks the sharing of Google Workspace document links, and delivers email notifications through Gmail.

«container»
DocuFlow Database
[MySQL (database server)]

Stores user accounts and roles with the encrypted Google Drive permission, documents and their revisions, Google Workspace links, file details and locations, document hashes, review records and remarks, AI feedback, AI knowledge and settings, the holiday calendar, in-system notifications, the audit trail, and the background job queue.
