Component Diagram - Audit Trail & Holiday Calendar

«container»
Web Application
[React]

Runs in the browser. Shows only the sections each role can use: My Documents, Review Queue, All Documents, and Submit Document, plus the search bar, the review screen with the AI feedback, the profile, and in-system notifications. For the Super Admin: Audit Trail, User Accounts, Holiday Calendar, and AI Settings.

Sends audit trail and holiday requests
[HTTPS / JSON]

Backend Application [Laravel / PHP (Apache application server)]
[container]

«component»
Access Middleware
[Laravel Middleware]

Checks the active session and ends it after 60 minutes of no activity or when the account is disabled. Allows only the sections, actions, and documents permitted by the role, ownership, or reviewer assignment.

Passes allowed requests (Super Admin only)

Passes allowed requests (Super Admin only)

«component»
Audit Trail Controller
[Laravel Controller]

Handles View Audit Trail and Export Audit Trail Records. Lists the audit records starting with the most recent, filters them by date range, account, role, action type, or reference number, and shows a record's full read-only details with the old and new values.

«component»
Holiday Calendar Controller
[Laravel Controller]

Handles Update Holiday Calendar. Shows the holidays of the selected year and adds, edits, or removes holidays (one per date), saving who added or last changed each one.

«component»
Holiday Preload
[Laravel Scheduled Command]

Runs once a year and adds the fixed-date regular holidays for the coming year.

Requests the CSV or PDF export

Records the export

Records holiday changes with the old and new values

Recalculates the TAT and overdue status of documents still in review

«component»
Report Generator
[Laravel Service]

Creates PDF and CSV files of the records being viewed, such as dashboard reports and audit trail exports.

«component»
Audit Logging Service
[Laravel Service]

Writes read-only audit records with a server-generated timestamp, including the old and new values when something is changed.

«component»
TAT Service
[Laravel Service]

Starts and stops each reviewer's TAT and counts it in working days (Monday to Friday), not counting the holidays in the Holiday Calendar or the time waiting for the submitter to revise.

Reads and filters audit records *[SQL]*

Reads and saves holidays and who changed them *[SQL]*

Adds the regular holidays *[SQL]*

Checks the account's role and status *[SQL]*

Writes audit records *[SQL]*

Updates TAT and overdue status; reads holidays *[SQL]*

«container»
DocuFlow Database
[MySQL (database server)]

Stores user accounts and roles with the encrypted Google Drive permission, documents and their revisions, Google Workspace links, file details and locations, document hashes, review records and remarks, AI feedback, AI knowledge and settings, the holiday calendar, in-system notifications, the audit trail, and the background job queue.
